

## PRODUCT BRIEF

Education  
Intel Unite® Solution

# Intel Unite® Solution: Collaboration Technology for Education

Wireless content sharing for untethered collaboration

### Intel Inside, 360° Learning Outside

Technology is transforming education, changing how and when students learn, both inside and outside the classroom. Intel is championing this transformation by empowering educators and students with innovative tools and solutions that have significant and sustainable impact on learning.

In today's digital world, collaboration is key for building 21st century skills and achieving deeper learning. Intel Unite® solution powers easy, secure wireless screen sharing from anywhere in the classroom. Students can collaborate wirelessly, while simple controls enable teachers to join, lead, or moderate<sup>1</sup> the group. With broad device support, intuitive experiences, and reliable performance that won't stress your school network, the Intel Unite solution app is the collaboration solution for 21st century schools.

### Get collaboration off to a FAST start

Teachers know that every minute in the classroom counts. Intel Unite solution powers fast, easy, and wireless screen sharing to new or existing displays, projectors, and interactive whiteboards, from anywhere in the classroom. There's no need to waste time untangling wires or searching for the right adapter or dongle. A 6-digit PIN is all you need to start sharing, viewing, and interacting with the content.

### POWERFUL collaboration for digital classrooms

Too many of today's tools don't get along, and digital collaboration in the classroom can be difficult when multiple technologies are involved. Intel Unite solution offers broad support for Windows,\* Macs,\* Chromebooks,<sup>1\*</sup> iPads,\* and Android<sup>1\*</sup> tablets, making it the perfect collaboration solution for devices throughout your school system.

With Intel Unite solution, you can wirelessly share full HD video with audio,<sup>2</sup> switch presenters with a single click, view multiple screens at once, make temporary annotations, and distribute files on the fly. Teachers will also love the ability to easily control sharing and viewing privileges,<sup>1</sup> as well as the extended mode feature that allows them to share their screens and multitask at the same time.

## COLLABORATION

Collaboration starts faster with Intel Unite solution, which offers powerful wireless screen sharing from Windows\*, Macs\*, Chromebooks\*,<sup>1</sup> iPads\*, and Android\*<sup>1</sup> tablets.

## MANAGEABILITY

The administrator web portal supports easy and secure remote management of settings and hub configuration profiles.

## OPEN PLATFORM

Too many of today's tools don't get along. Intel Unite solution is an open and extensible platform that can work with existing technologies.

### Stay safe with enterprise-grade SECURITY

- **Secure Data:** Enterprise-grade security ensures that data is 256-bit Secure Sockets Layer (SSL) encrypted and stays within your school network. Data always stays within the virtual walls of your school and isn't dependent on any additional vendor solutions.
- **Protected Guest Access:** Intel Unite solution uses rotating PIN codes to improve security within your trusted network. And with the Protected Guest Access plugin, guests can also view and share via a temporary Wi-Fi hotspot generated in the room, without gaining access to your school network.
- **Meeting Lock:** Prevent unwanted participants from joining and viewing content by activating the Meeting Lock feature built in as part of Intel Unite solution.

### Greater MANAGEABILITY for a happier IT department

Intel Unite solution is the collaboration platform your IT team will love. The Intel® vPro™ technology powers remote management over wired or wireless networks across devices. It enables access to clients through a secure channel irrespective of power or OS state, supports remote patching, repairing, and upgrading of operating systems and applications, and allows inventory of client-side software and hardware to be taken remotely, all through an easy-to-use admin portal.

Moreover, with the new Telemetry plugin, Intel Unite solution hubs can now track and report the entire usage of collaboration spaces, allowing IT to gather real-world usage and classroom analytics data, and to gain new insights into technology adoption and utilization.

For more information, visit [www.intel.com/unite](http://www.intel.com/unite)

### COST-EFFECTIVE classroom upgrade

There are no license fees associated with the Intel Unite solution. The software comes bundled with designated Intel-powered hardware for the hub devices in classrooms or meeting rooms. Feature updates are also included. Furthermore, the Intel Unite solution helps lower your total cost of ownership by combining all of your collaboration functionalities into a single platform that supports all operating systems,<sup>1</sup> as well as off-the-shelf peripheral equipment across vendors, offering schools a better collaboration and content sharing experience.

<sup>1</sup> Features available with Intel Unite® Version 3.1.

<sup>2</sup> Feature available on Windows\*-based clients.

Intel technologies' features and benefits depend on system configuration and may require enabled hardware, software or service activation. Performance varies depending on system configuration. No computer system can be absolutely secure. Check with your system manufacturer or retailer or learn more at [intel.com](http://intel.com).
